

Erika Salvador

erikasalvador@utexas.edu | 832-876-1605 | <https://www.linkedin.com/in/erika-salvador-cs>

Education

University of Texas at Austin | Bachelors in Computer Science | August 2024 - May 2028

Minor in Business | Minor in Educational Psychology

Relevant Coursework: Data Structures, Android Mobile Computing, Machine Learning, Cloud Computing

Experience

Fidelity Investments | Software Engineer Intern | Westlake, Texas

June 2026 - August 2026

- Built a new internal **AI agent (Python, LangChain, YAML, Splunk SPL)** automating natural-language-to-Splunk-query generation, cutting query development time by **80%**
- Implemented a **meta-data YAML catalog** across 3+ brokerage applications, enabling per-app SPL customization without Python changes
- Designed a four-layer guardrail system (**context filtering, prompt overrides, early intent routing, post-generation regex correction**) to enforce deterministic SPL output from the LLM
- Redesigned the **front-end UI**, introducing a more cohesive design and updating to list relevant example prompts

Thrivent | Software Engineer Intern | Remote

June 2025 - August 2025

- Designed **component-driven UI elements** for a client-facing dashboard serving **2.3 million clients**
- Engineered a dynamic Call-to-Action banner using **GraphQL and JavaScript** with a component-driven, server-client architecture
- Modernized UI components during Thrivent's **brand refresh**, redesigning banners and headers to increase policy transparency

iCode Cypress | Campus Manager | Cypress, Texas

August 2022 - August 2024

- Designed and led engaging lessons in **HTML, CSS, JavaScript, and Python** by analyzing student learning patterns and refining instructional methods
 - Managed 15+ employees and taught STEAM summer camps, such as **Unreal Engine, Roblox Studio, Website Developer, and Robotics**
 - Authored training resources that streamlined onboarding and boosted new instructor readiness
-

Projects

Basketball Analytics Modeling (Python/scikit-learn) - Built linear regression models on NBA/ABA/WNBA player data, identifying steals as a stronger predictor of WNBA win shares per game

Wello (GitHub) - Engineered a mobile app leveraging OCR, barcode scanning, and AI-driven product analysis to prevent food-drug interactions and deliver personalized nutrition insights for chronic illness patients

NextHire (GitHub) - 1st Place at FidHacks with Fidelity Investments - Programmed a women's empowerment journaling platform in Next.js on a 3-person team during a 24-hour hackathon, with integrated audio recording and a responsive front end

RoundUp (GitHub) - Best Design at UT Women in Computer Science Hackathon 2025 - Developed a peer-powered task exchange and student-connection platform on a 4-person team during a 24-hour hackathon using Firebase and TypeScript

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, Kotlin, C, R, HTML, CSS

Frameworks/Tools: React, Next.js, LangChain, GraphQL, Firebase, Splunk SPL, ML, Jira, DataDog, VSCode

Certifications

Break Through Tech AI Program – Cornell Certificate in Machine Learning Foundations
